Project Initialization and Planning Phase
Date 30 September 2026 | Maximum Marks 3 Marks

Project Name: EduGenie: Google Gemini Powered Learning Assistant

Define Problem Statements (Customer Problem Statement Template):

A customer problem statement helps the EduGenie team understand students' point of view. The statements below focus on college/university students, self-learners and exam-preparation students who need quick explanations, self-testing, summarization and structured learning support.

Problem Statement	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A college or university student who is learning a difficult topic.	Understand difficult concepts quickly.	I struggle to find simple explanations that match my level.	Complex textbook and online explanations can be difficult to understand.	Confused and unsure.
PS-2	A student preparing for exams.	Test my understanding through quick practice.	I have to create self-test questions manually.	Preparing useful questions takes extra time and effort.	Unprepared and stressed.
PS-3	A student with long notes or study material.	Revise important information quickly.	I find it difficult to summarize long material efficiently.	Long notes contain too much information to revise at once.	Overwhelmed and short of time.
PS-4	A self-learner exploring a new subject or skill.	Follow a clear step-by-step learning path.	I don't know what to learn first or what to practice next.	Learning resources are often scattered and lack a structured sequence.	Lost and hesitant to begin.

How EduGenie Responds: EduGenie brings five study tools into one AI-powered assistant: Question & Answer, Concept Explanation, Quiz Generator, Text Summarizer and Personalized Learning Path. It uses Google Gemini to provide clear, easy-to-understand and structured learning support. Target users include college/university students, self-learners and students preparing for exams.
