

EduGenie | Team Project

No. of Functional Features Included in the Solution

Date: 30 September 2026 Team Members: Elango, Vahini, Kalaiselvi, Shivasakthi, Yuvarani

Project Name: EduGenie: AI-Powered Personalized Learning Web Application

Maximum Marks: 5 Marks

Functional Features Overview:

This document lists the functional features included in the EduGenie solution. The features focus on personalized learning, subject selection, AI-assisted study support, progress tracking, quizzes, learning resources, and plan management.

S.No	Feature Name	Feature Description	Module / Component	Status	Marks
1	Login / Logout	Sign in with username and password and sign out. Each learner's preferences and progress are kept separate.	Login, Layout, Navbar, storage	Done	0.5
2	Learning Goal Questionnaire	Guided steps collect learner name, subject, level, learning goal, available study time, preferred topics and learning preferences.	Learning Setup, Step Indicator	Done	0.5
3	Answer Validation	Required learning preferences are checked before moving forward and before generating the personalized learning plan, with friendly error messages.	Validation, Learning Setup	Done	0.5
4	Personalized Learning Plan	Builds a study schedule from learner preferences, subject, level, topics and available time, with fallback rules so a plan can be produced.	Plan Generator, Learning Data	Done	0.5
5	Dashboard: Stats & Next Lesson	Shows current subject, learning goal, completed lessons, progress percentage and highlights the next recommended learning activity.	Dashboard, Stat Cards, Progress Bar	Done	0.5
6	Weekly Learning Checklist	Displays planned lessons with day, topic, duration and status. Learners can mark activities as completed.	Weekly Tracker, Lesson Card	Done	0.5
7	Lesson Detail Page	Shows lesson topic, learning objectives, explanation, examples, key points, practice activity and completion guidance.	Lesson Page	Done	0.5
8	Mark Lesson Complete & Progress	Marks a lesson complete and updates the checklist, progress percentage and learning streak.	Lesson, Dashboard, Storage	Done	0.5
9	Sample Learning Plans	Provides ready-made study plans such as Beginner English, Mathematics Foundation and Exam Preparation that can be adopted by the learner.	Samples Page, Plan Card, Sample Data	Done	0.5
10	Edit / Recreate Learning Plan	Allows the learner to regenerate a plan from the plan page, save it, or return to the questionnaire and update preferences.	Plan Page, Dashboard, Plan Generator	Done	0.5

Total: 10 / 10 Done — 5.0 Marks

Marks Contribution is the team's proposed split of the 5 marks: 0.5 per feature.

EduGenie — Feature Summary

Metric	Count / Value
Total Features Planned	10 features covering the main functional requirements of the EduGenie learning application
Total Features Implemented	10 (all planned features are included in the solution)
Core / Must-Have Features	8 (Features 1 to 8: authentication, learning setup, validation, personalized plan, dashboard, checklist, lesson details and progress tracking)
Additional / Nice-to-Have Features	2 (Sample Learning Plans and Edit / Recreate Learning Plan)
Features Tested & Verified	The core flow includes login/logout, dashboard, checklist, learning setup and validation, sample plans, lesson details and lesson completion. Edit / Recreate Plan can be tested separately.

Feature Category Breakdown

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	5	Learning questionnaire, dashboard with stat cards, weekly checklist, lesson detail page, sample plan cards; responsive layout, Navbar and Footer.
2	Backend / Logic	4	Answer validation, personalized learning-plan generation, progress and streak calculation, plan regeneration. Logic can run in the application layer.
3	Database / Storage	4	Browser localStorage or application storage keeps logged-in user, preferences, current and saved plans, completed lessons and learning dates when using a client-side implementation.
4	API / Integration	1	Optional AI integration for generating explanations, summaries, quizzes or personalized recommendations. If the submitted version has no API, mark this as Not Used.
5	Security / Authentication	1	Demo login, route guard and per-user data separation. Production deployment should add secure server-side authentication and authorization.

Note: This EduGenie version is a project-specific conversion of the supplied FitBuddy functional-feature document. Where the source document did not specify an EduGenie implementation detail, the wording has been adapted at the project-feature level rather than claiming a specific technology that was not supplied.
