Team ID	6abc95cbdfc814753aa5fe42
Team Name	EduGenie: Google Gemini Powered Learning Assistant
Project Name	EduGenie
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for the EduGenie project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy the solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	To be updated
2	README / Setup Guide (instructions to run the project)	To be updated
3	requirements.txt / package.json / dependency file	To be updated
4	Database schema / seed files (if applicable)	To be updated
5	Environment configuration file (.env.example or similar)	To be updated
6	Deployed application URL (if hosted)	To be updated
7	APK / Executable binary (if applicable)	NA / To be updated
8	Dockerfile / Containerization config (if applicable)	To be updated
9	Test files and test results	To be updated
10	Demo video or walkthrough (if required)	To be updated

Step 2: File / Folder Structure

Provide an overview of the EduGenie project's file and folder structure below. The exact structure should be updated to match the submitted source repository.

```
edugenie/  
|-- public/  
|-- src/  
|   |-- components/  
|   |-- pages/  
|   |-- data/  
|   |-- services/  
|   |-- utils/  
|   |-- App.jsx / App.js  
|   |-- index.css  
|   |-- main.jsx / main.js  
|-- index.html  
|-- package.json  
|-- package-lock.json  
|-- README.md  
|-- [other project-specific files]
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	To be updated
Login Credentials (Demo)	To be updated, if applicable
Platform / Hosting Provider	To be updated
Repository Link	To be updated
Demo Video Link	To be updated, if available

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run the EduGenie project locally. The following is a fill-in structure; update the commands to match the actual submitted project.

Pre-requisites:	Node.js (if applicable), npm, Git, a modern web browser, and any project-specific services or API configuration re
Step 1:	Clone the repository: git clone <your-public-repository-url> and then cd edugenie
Step 2:	Install dependencies using the dependency manager specified by the project, for example: npm install
Step 3:	Configure required environment variables/API keys using the project's documented .env.example or setup instru
Step 4:	Start the development server using the command specified in package.json / README.
Step 5:	Open the local address shown in the terminal in a browser and test the EduGenie learning-assistant features.
Step 6:	Optional: create a production build using the project's documented build command.

Step 5: Known Issues / Limitations

Update this section after testing EduGenie. Do not copy FitBuddy-specific issues into the EduGenie documentation.

S.No	Known Issue / Limitation	Workaround / Status
1	To be updated after EduGenie testing	To be updated
2	To be updated after EduGenie testing	To be updated
3	To be updated after EduGenie testing	To be updated
4	To be updated after EduGenie testing	To be updated
5	To be updated after EduGenie testing	To be updated
